SUESSEN

Modernization of existing ring spinning machines

Suessen is one of the leading companies in the developing and manufacturing spinning components and parts for textile spinning machinery. It may be pointed out that Suessen has developed and manufactured all SpinBoxes SE 6 to SE 10 and is the original equipment manufacturer (OEM) of all Spinning Components and Spare Parts of Autocoro SpinBoxes SE 6 to SE 10.

The company specializes in modernization/upgrading/retrofit of ring spinning and roving machines as well as Autocoro Rotor Spinning Machines. Uptodate, more than 50,000 ring and roving machines and 600 rotor spinning machines have been upgraded to the satisfaction of the customers.

Ring Spinning

EliTe®CompactSet

Modernization of existing ring spinning machines with the SUESSEN EliTe®Compact Spinning System for:
- short-staple spinning of Cotton, man-made fibres and their blends,
- worsted (long-staple) spinning of wool, man-made fibres and their blends.

The EliTe®CompactSet is applicable to almost any type of ring spinning machine. At the moment the EliTe®CompactSet is available for ring spinning machines type RIETER, Jingwei, Shanghai, Zinser, Lakshmi, Toyoda. Other types and models are in technical preparation.

HP Modernization Set

Modernization of conventional ring spinning machines and roving frames with HP Drafting Systems. The HP

HP Components

Spare Parts and Spinning Components for ring spinning machines and roving machines.

Rotor Spinning

Compact SpinBox SC

Complete Modernization of Autocoro Rotor Spinning Machines SE 8 and SE 9

Quality SpinBox SQ

Partial Modernization of Autocoro Rotor Spinning Machines SE 7 to SE 10

Premium Parts

Original Spinning Components and spare parts for Autocoro Rotor Spinning Machines SE 7 to SE 11.
