

Ali Industries - Expert manufacturers of overhead cleaners and spareparts of textile mills

Ali Industries is situated in Sheikhpura, which is one of the growing industrial cities of Pakistan, located on the very end of the Faisalabad Road, which leads to the textile manufacturing hub of Faisalabad. Ali Industries is active in manufacturing and sale of overhead cleaners and spare parts of textile machinery. In 1981, they developed the first set of new model high speed suction blower, on the basis of design and absorption blowmaster, according to the National Federation of Textile industries. With serious efforts and continuous innovation, blowmaster has reached the international advanced level of today.

Overhead Cleaners & Spare parts of Textile Mills

Blowmaster 06 Pipe Model R 002(A)

- ❖ Robust overhead cleaning equipment is installed to get best results and to give our customers a satisfied service.
- ❖ 4.00 Horse Power motor ensures an ideally controlled working of drive belt.
- ❖ Two blow pipes are fitted with 10 nozzles for each pipe for sufficient air supply system.
- ❖ 4 suction pipes with a motor are provided for dust collector. The dust collector unit is fitted with a filter.

Blowmaster 06 Pipe Model R.002 (B).

- ❖ 8 feet P.V.C. suction pipe completely sucks any unwanted fluff which would result in best quality of the product.

Blowmaster 04 Pipe Model R. 001

- ❖ Robust overhead cleaning equipment is installed to get best results to give the customers a satisfied service.
- ❖ 2.2 Horse Power motor ensures an ideally controlled working of drive belt.
- ❖ Two blow pipes are fitted with requirement of customer nozzles for sufficient air supply for the system.
- ❖ 8 feet P.V.C. suction pipe completely sucks any unwanted fluff which would result in the best quality.
- ❖ A motor is provided for dust collector, the dust collector is fitted with filter. ♦

Avery Dennison

Avery Dennison Fastener has an international reputation as the industry leader of innovative plastic fastening solutions and invented high efficiency product tagging. These tools continue to set industry standards for quality and dependability, and they are the original inventor of Swiftach®, Elastic Staple™, Plastic Staple™, MicroPin™,

MicroStitch™ and Buttoneer® Systems and offer a wide variety of injection/extrusion molded products. Avery Dennison sells solutions, from tag attaching and brand identification fastener for apparel manufacturers and retailers to specialized fastener for the automotive and loss prevention industries, they offer innovative products that meet your business needs.

Furthermore, the Company can also offer the manufacturers of hard goods, children's toys and DIY Tools, the innovative solutions to minimize packaging waste and make their products more consumer friendly. They also offer a wide range of

hand labelling systems for SKU identification, date coding and inventory control.

Novozymes – leading innovation in Textiles

Novozymes is one of the world leaders in bio-innovation. Together with customers across a broad array of industries the company is known for industrial biosolutions, while improving customers' business and the use of our planet's resources. Novozymes is the enzyme market leader in the textile industry, helping customers to build new fashions, improve fabric quality and create new technologies. From pre-treatment of fabrics to garments finishing, these innovative and unique enzyme solutions give fabric and garment producers an edge to stay ahead of competition.

Xsis Apparel Machinery

Xsis Apparel Machinery offers an extensive range of leather and textile processing and finishing machinery, accessories and spare parts. They also represent some of the

leading textile machinery manufacturers for processing and finishing of leather, textiles and textile-related products.

The qualified and technically competent sales staff offer consultative advice and solutions to meet customers' requirements and can propose a wide range of competitively priced machinery and equipment, to assist in improving productivity, efficiency and quality whilst providing the fastest return on investment for capital employed. The Spare Parts Department is available to offer technical advice on replacement spares with a view to ensuring quick supply and minimum machine downtime. Either parts are supplied ex-stock from local warehouse or where parts are not held in stock, the dedicated team sources and orders parts with emphasis placed on the quickest possible delivery at a competitive price.
