

# Oerlikon Textile mainly presents exhibits from Oerlikon Schlafhorst and Oerlikon Barmag

In Istanbul, the exhibits of Oerlikon Schlafhorst and Oerlikon Barmag will dominate the booth of Oerlikon Textile - the world market leader for spinning and texturing machines, embroidery machines and production lines for plied yarns as well as with lines for non-woven fabrics, BCF yarns and manmade staple fibres. At its 400 sqm booth in hall 2 stand A 210, Oerlikon Textile will present following products and services for the interested visitors.

## Oerlikon Barmag: High-quality yarn specialties

At this year's ITM, Oerlikon Barmag is presenting its competence in the area of specialty spinning. POY and FDY super-micro-yarns, spun-dyed yarns and various yarn cross sections, such as trilobal yarns, for example – the Oerlikon Barmag portfolio is comprehensive.

As a solutions provider, the company – with its extensive engineering competence – is able to offer total solutions that are perfectly tailored to the requirements of regional niche markets.

In the DTY sector, the focus is on the eFK texturing machine, which – with the energy saving godet technology from the MPS and COCOON and the ergonomic handling of the FK6-1000 – combines the proven technologies from various Oerlikon Barmag texturing machines.

## Oerlikon Schlafhorst: Winding, ring spinning and rotor spinning technology

Since 125 years, Oerlikon Schlafhorst a leading process competence for quality yarns up to the finished high-end packages. Oerlikon Schlafhorst is the only supplier on the market to provide the spinning mills all over the world with the entire product line, irrespective of the spinning process.

The Autoconer 5 with the innovative PreciFX is an unambiguous evidence for the leadership in innovation of Oerlikon Schlafhorst in the field of automatic package winding.

In the field of compact yarns as well as of short staple spinning of cotton and long staple spinning of wool, the technological details and advantages of the Zinser CompACT<sup>3</sup> system stand out.

Last but not least, Oerlikon Schlafhorst offers the entire rotor spinning machine family – Autocoro and BD line - with new performance features for more quality and productivity.

Oerlikon Schlafhorst: Autoconer 5.

Allma TechnoCorder.

## Oerlikon Neumag: Turnkey solutions

In the last few years, Oerlikon Neumag has accumulated know-how regarding the integration of different technologies through targeted international acquisitions.

The company is the only supplier to offer the most comprehensive portfolio with turnkey solutions for the production of airlaid and spunbond webs for hygienic, medical, filtering and automotive purposes among other things.

The range comprises package solutions for spunbond webs, carded webs and airlaid products as well as the single technologies meltblown, carding, crosslapping, needling, aerodynamic carding and festooning.

On the other hand, it is possible to combine different methods for developing innovative nonwoven products and processes and for opening up new markets. Furthermore, the visitors of the ITM exhibition can discuss the latest developments for BCF yarn and synthetic staple fiber plants.

## Oerlikon Saurer: Embroidery and twisting systems

Oerlikon Saurer is the world market leader in embroidery and twisting systems. Here a wealth of experience extending back over many generations is coupled with up-to-date knowledge for the textile future. In Oerlikon Saurer, a 155-year-old textile tradition is fused with state-of-the-art technology to create a symbiosis of knowledge, quality and security.

In the embroidery sector, the product lines Saurer and Melco are the leading suppliers of shuttle embroidering machines and multi-head machines. In the twisting sector, the Allma and Volkmann brands are market leaders in the segments of clothing staple, carpet yarn, tyre cord, industrial and glass yarns. The booth at the ITM in Istanbul provides the visitors with all information regarding the latest technology innovations. ♦
