

## Madhani Associates

Established in 1976, Madhani Associates has been promoting quality textile machines and accessories from Europe and USA. The company has always strived to bring new technologies and ideas into the Pakistan textile market. For example, Madhani has been one of the leading companies in introducing the shuttleless looms, introducing rope technology in denim, helped the spinners into converting the spinning mills from making normal yarn to fancy yarns, the only company to introduce knotless plied yarn and many other technologies.

Madhani has offices in Karachi and Lahore and has qualified sales and after sales service staff, trained abroad so that they could provide a proper back up and solutions to textile industry. Madhani also maintains a spare parts inventory to minimize breakdown time of the equipment supplied by Madhani.

Madhani works with reputed companies like Bellwether manufacturer of Gripper for Sulzer Loom, Caipo Automazione Industriale S.r.l., Italy manufacturer of the slub and fancy yarns, Canalair S.p.A., Italy, manufacturer of Air-conditioning, Humidification plant for Textile and other industries, Hunter Associates Laboratory Inc., USA for manufacturer of comprehensive Integrated Color measuring solutions for all textile and non-textile items, Icomatex, Spain manufacturer of Stenter Frames, Coating machines, Karl Mayer Textilemaschinenfabrik GmbH, Germany, of Slasher Dyeing, Indigo Rope Dyeing, Sizing Machine for Denim, Direct Warpers for Denim, Ball Warpers and Long Chain Beamers for Indigo Rope Dyeing Range, Lakshmi Machine Works Ltd, India, manufacturer of complete spinning mills from Blow room to Ring Frames, Lawer S.p.A., Italy, manufacturer of Dosing and Dispensing units for Dyeing, Printing and Finishing Units. Mesdan S.p.A., Italy manufacturer of the splicers and laboratory equipment, Obem S.p.A., Italy, manufacturer of the yarn dyeing and autoclaves, Scaglia S.p.A., Italy for high quality bobbins, Thema System S.r.l., Italy manufacturers of Two for one Twisters for Filament

New CSTU - Caipo slub and twist unit.

and Fancy Twisting Machines, Topsun Industries Co, Ltd, China, manufacturer of all type Textile Beams and accessories, Zancaner S.r.l., Italy, manufacturer of automation solution for textile industries.

Madhani will be displaying latest technology from following principals.

### CAIPO

**CSTU Slub & Twist Unit** : For Ring and Open End which can produce long slub, short slub, Caipo Short Slub (CSS), extremely thick slub, slub over slub, negative slub, multicount, slub with multicount multi-twist and slub with multicount/multi-twist.

**Filopiu Unit**: For Ring Frame (Core Spun Yarn) (elastane insertion, rigid filament insertion) with elastane sensor, roving block, elastane stopper.

Mesdan Splice Scanner III.

### MESDAN

**Mesdan Splice Scanner III**: To check the Splice Strength & elongation of the yarn and single yarn. (Can be taken to the production area).

NATI - Neps and trash indicator.

**NATI - NEPS AND TRASH INDICATOR**: To check the Nep and Trash of raw cotton card, draw frame and combing machine sliver.

**LAB KNITTER**: To check the dyeing, uniformity and dye affinity of the yarn and comparison of different yarn bobbin.

**AQUA SPLICER 4923B**: For splicing double yarn for TFO and Assembly Winder on A.T.S.

**JOINTAIR SPLICER 4941A**: For splicing high twisted single and double synthetic yarn on A.T.S.

**JOINTAIR 115**: For fine and medium count yarn.

**Splicer 4923E**: For splicing elastane core yarn, course count yarn and compact yarn on Savio Automatic Winder.

### SWF embroidery machines

Imran Enterprises offers full range of services from apparel design and manufacturing. They will participate at Textile Asia with Harris Enterprises and display new technology from SWF Embroidery machines manufactured by Sunstar Co. Ltd. Korea. They will demonstrate several new models of SWF machines with high speed, maximum production almost minimum maintenance with sequins SQ30.

SWF DM Multi head embroidery machine.

The following new models of SWF will be demonstrated at the show:

1. SWF/GE-WE920-120 – Both side sequins device, 850 RPM.
2. SWF/SC-WE920-120 – Both side sequins device, 1200 RPM.
3. SWF/DM-WU(2X)656-150 – Single side sequins device, 1300 RPM.
4. SWF/DM-WE920-120 – Both side sequins device, 1500 RPM.

The management of Imran Enterprises and Harris Enterprises will also demonstrate DM56 Heads and DM20 Heads machines at the premises of Imran Enterprises. Shuttle service will be provided during Textile Asia 2010 Exhibition. ♦
