

## Marhaba General Trading Company

Marhaba General Trading was established in 1998 at Lahore, Pakistan to promote the marketing of textile machinery, textile dyes, chemicals and auxiliaries. Marhaba General Trading Company will exhibit following products of their principals.

### Automatic edge sewing machine by Hsing Cheng Machinery Industrial Co. Ltd.

This HC AEN machine is suitable for Spandex, Lycra and Knitted fabrics and offer two types of sewing options

- ❖ Nailing completely type sewing.
- ❖ Interval stitch type- adjustment by PLC can be random setting stitch distance.

Two models for selection are continuous stitch and interval stitch advanced design with 90 degree easier fabric passage meets customer needs than traditional machine with linear passage.

HC-AEN: Automatic edge sewing machine

AK-QAO SS rapid dyeing machine by Asia Kingdom

### Rapid Dyeing Machine by Asia Kingdom Machinery Co. Ltd.

AK-QAO rapid dyeing machine can operate smoothly even when nozzle pressure is under 0.5kg/cm<sup>2</sup>. This machine is suitable for spandex and low tension fabric's running requirement. Other important features are given follows:

- ❖ Low liquor ratio 1:5-7 helps to save chemicals cost and energy.
- ❖ Low height, low tension, low shrinkage and easy to achieve fabric's final weight.
- ❖ Foam collection system, which ensures that during dyeing process, the foam will be collected in the foam collector. It separates the fabric from the foam and avoids fabric floating, tangling and pollution problem.

- ❖ Inner shower spray system.
- ❖ Tank body manufacture by A-class, highly resistant to corrosion, stainless steel from Europe (AZ40-316L) and (SUS316) Japan.
- ❖ Kier & heat exchanger manufactured according to highest industrial standard (U.S.A & Japan). High strength and highly resistant to pressure.

### JSA8210 Air Jet Loom by Wefang Jinshuai Machinery Co. Ltd.

JSA8210 air jet loom is an economical design for weaving cotton fiber and chemical fiber.

- ❖ Weaving range: Short filament 7-80Ne; Filament 40-1000dtex.
  - ❖ Economical speed: cam shedding 750rpm; dobby shedding 550 rpm.
  - ❖ Reed space: 190, 210, 230, 280cm
- JSA8210 Air Jet Loom will also be on display. ◆

## BNI INKS: Textile screen printing inks manufactured first time in Pakistan

BNI INK is popular for its unmatched quality and diverse range of printing inks, special effects inks and heat transfer inks. The sophisticated formulations of BNI INK produces top-notch quality prints. BNI INKS is a result of Joint Venture with China's leading manufacturer of screen printing textile inks company.

BNI INKS has recently announced that its textile screen printing inks will be manufactured in Pakistan. BNI INK is a result of Joint Venture with China's leading manufacturer of screen printing textile inks company and in partnership with Mrs. Amy Huo.

BNI products are Phthalate and lead free, plastisol and water based inks. BNI INK is popular for its unmatched quality and diverse range of printing inks, special effects inks and heat transfer inks. The sophisticated formulations of BNI INK produces top-

notch quality prints every time impeccably.

According to Malik Ahmed Abbas, Sales & Marketing Manager, "We always are in search of latest technologies. Our products have gained consumer's satisfactions and trust in Chinese market and now we are proud to introduce ourselves to Pakistani market."

BNI INK manufactures everything from

high quality textile inks to widely diversified screen printing supplies. The company specializes in standard screen printing inks, but can also offer a wide range of printing inks for special effects

printing. Each and every product is designed with quality and performance in mind. BNI invests a large amount of resources into research and development, which allows the production of the best possible products. ◆
