

Mars Trading Company Ningbo Dechang

Ningbo Dechang Textile Machinery Co., Ltd is located in Ningbo, an east coastal city in Yangtze Delta developing fast in economy, which is close to Hangzhou Bay, next to Beilun Harbor. Dechang as a subsidiary of Yunsheng Group is a high-tech enterprise specialized in research & development, manufacture, sales and service of the compact-spin machines.

Over 100,000 spindles in the Pakistani spinning mills have Ningbo Dechang China compact spinning technology giving excellent performance at very cost effective prices. The compact system reduces yarn hairiness, increasing its strength, allowing higher production by reducing the twist. The increased strength makes the yarn suitable for airjet looms.

Oshima

Shanghai Sanyu Electron Co. Ltd. Is the professional manufacturer of garment needle detector, fabric inspecting machine and thread-brushing clearance machines. Almost 60 to 70 new fully automatic conveyor needle detectors are being used in hometextiles and garment industries in Pakistan. The ON-V740C – Full automatic needle detector is latest addition to Oshima machines.

Butt Technical Services

BTS was established in 1976 with its head office in Karachi and branch office in Lahore from 1981. In the beginning, the company started installation of textile machinery in dyeing, printing and finishing sector. From 1986, the company started buying textile machines from Europe and selling in Pakistan also on commission basis. Butt Technical also provides Energy Saving Services and Solutions in gas and electric usage on stenters and gas on other hot- process machines.

BTS provide flexible service solutions to meet the demands of constantly changing market requirement by dealing in large range of modern refurbished and reconditioned machines.

BTS also provides the complete Technical Services which range from Plant Layout to Service Contract. They also operate as Consultants on turn key basis from feasibility to installation and post operation services.

Legrom Germany

Legrom has been manufacturing textile machinery components for the open-end and ring spinning processes for more than 40 years. Their products are used both by OEMs in the original equipment as well as by the spindle manufacturers. They have been supplying spare parts for textile machinery to spinning mills directly or via distribution partners – around the globe for more than 25 years.

Spare parts for textile machines: open end, ring spinning, weaving mills, synthetic fiber etc. are available with Legrom. With help of their development and design department (CAD/CAM) they can implement customer-specific requirements even at short notice. Legrom Germany is represented in Pakistan by Aartex International.

Unique International

Unique International has been in business for last nine years, as an independent company active in supply of quality spare parts for textile finishing machines and textile lubricants.

Rota Chemicals is specialist, producer and exporter of Industrial Textile Chemicals, Leather Chemicals, Swimming Pool Chemicals and Paper Chemicals. The company follows International Quality Standards and modern manufacturing procedures and has know-how technology together with well educated and qualified staff. The annual production and average sales are around 5000 tons/year and with 60 different kinds and range of products, ROTA is quite popular in the domestic market of Turkey. Rota Chemicals can be contacted at Textile Asia through Unique International.
