

Fairs & Exhibitions

The Textile Meeting of EURASIA: ITM Texpo Eurasia 2012

ITM Texpo Eurasia 2012 Exhibition will be simultaneously held with HIGHTEX 2012 Technical Textiles and Nonwovens Exhibition and Istanbul Yarn Fair on 21-24 April 2012.

ITM Texpo Eurasia 2012 Exhibition will bring together the world's leading textile technology manufacturers in Istanbul at Tuyap Beylikduzu Fair and Congress Center.

ITM International Textile Machinery Exhibition, whose 4th edition will be organized in 2012, joined with Texpo Eurasia International Textile, Weaving, Yarn, Finishing, Knitting, Hosiery Machines, Side Industries and Chemicals Exhibition. The combined event is renamed as ITM Texpo Eurasia 2012. The synergy to be created with the combination of these two exhibitions will accelerate the recovery trend in the Turkish Textile industry.

Turkey being still continues to be the location of interest in the international arena with its potential, experience, know-how, qualified human force, production capacity, production capacity, quality as well as development in R&D and other features.

As per the international trade statistics during 2010 and in the first half of 2011, apparently the crisis faced by the textile industry since 2008-2009 has now ended and textile investments in Turkey continue to increase. At this speed, it seems that the

investments in Turkey will reach the level before the crisis by the end of 2011.

ITM Texpo Eurasia 2012 Exhibition is expected to be an exhibition visited by the visitors from Turkey and other countries in the region. More than 50.000 visitors mainly from the Middle Eastern, the Balkans and African countries will be visiting the show.

Turkish textile manufacturers are expecting new orders during the exhibition. ITM Texpo Eurasia 2012 Exhibition is being organized with the cooperation of TEKNİK Fuarçılık -TÜYAP and the support of TEMSAD, the textile machinery manufacturers association in Turkey. Technologies to be Exhibited

At ITM 2012 Exhibition, Cotton and Fiber Preparation, Yarn Preparation, Yarn Twisting, Weaving Preparation and Weaving, Flat and Circular Knitting, Quilting, Hosiery, Embroidery, Dyeing-Printing-Finishing Machineries, Textile Chemicals, Laboratory Equipments and Quality Control Systems, CAD- CAM-CIM Application and Automation Systems, Machinery Spare Parts and Accessories will be exhibited.

All related technology, raw material, chemicals and semi-products and end-products related with technical textiles and nonwovens will be exhibited at HIGHTEX 2012 to be organized at the same venue, at the same dates.

HIGHTEX 2012: Istanbul, the meeting place for World Technical Textiles:

The technical textiles and nonwovens industry, which has become the most important market of today, will gather at HIGHTEX 2012 Exhibition to be organized in Istanbul on 21-24 April 2012.

Turkey which has been developing rapidly in the field of technical textiles and nonwovens will host the world's leading trademarks in technical textiles at HIGHTEX 2012.

The 4th HIGHTEX 2012 Istanbul Technical Textiles and Nonwoven Exhibition organized by Teknik Fuarçılık will be held concurrently with ITM Texpo Eurasia.

At HIGHTEX 2012 technical textiles raw materials, semi and finished products, and production technologies will be displayed. HIGHTEX 2012 Exhibition being the largest technical textiles and nonwovens meeting in Middle East and Eastern Europe.

In Turkey, the textile industry has recovered and investments have increased since the end of the global economic crisis. Many important investments have been realized in the field of technical textiles and nonwovens. Turkish companies, which became important semi product and finished product exporters in the world, are among the largest buyers of technological investments.

In line with these developments, it is expected that HIGHTEX 2012 Exhibition shall be an important platform to host investments in the world's fastest growing technical textiles and nonwovens market and shall provide new opportunities. ♦
